Cloud Cover(Octa)	3	1	0	4	4

Weather Summary/Alert:

In the upcoming days very light rainfall of 2.0-4.0 mm has been predicted. Maximum & minimum temperature may be 10.0-14.0 degree Celsius & 2.0-4.0 degree Celsius, respectively. Wind is expected to blow with a speed of 6-8 km/hr from the north-east, east-south-east, north-west and north-west-north direction. Very light to light rain likely to occur at isolated places on 24 & 27 December. Light to moderate rain is likely to occur at a few places on 28 December. Dry weather is likely to prevail on 25, 26 & 29 December.

General Advisory:

The weather forecast and agrometeorological advisory is regularly updated on the "Meghdoot App" and "Damini App" is also available to get lightning information. Meghdoot and Damini apps can be downloaded from Google Play Store (Android users) and App Center (iOS users). The NDVI composite shows moderate agricultural vigour in the region. Deep plowing of the orchards is must for destroying the mig insect, fruit fly, gujiya weevil and webber insect. Regular hoeing and weeding of the pulse crops should be done. Irrigation should be applied in case of ground frost. The extended range forecast system indicates below normal rainfall, normal maximum temperature and below normal minimum temperature trend.

SMS Advisory:

As per IMD forecast, the predictions show very light rainfall on few days in the upcoming week so the farming activities should be scheduled accordingly and harvested produce should be stored well.

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
CHICK PEA	The crop should be monitored and regular hoeing and weeding should be done as required.
LENTIL	The crop should be monitored and regular hoeing and weeding should be done as required.
RAPESEED	The crop should be monitored regularly. Light irrigation should be applied in valleys and lower hills as per requirement and in case of pest/disease attack,

Crop (Stage)	Crop Specific Advisory
	recommended practices should be followed. The farming operations should be done keeping the forecast in mind.
MUSTARD	The crop should be monitored regularly. Light irrigation should be applied in valleys and lower hills as per requirement and in case of pest/disease attack, recommended practices should be followed. The farming operations should be done keeping the forecast in mind.
WHEAT	In both irrigated and rainfed conditions regular monitoring of the crop and suitable farming practices should be followed and done regularly. The farming operations should be done keeping the forecast in mind.
BARLEY	The crop should be monitored regularly for hoeing and weeding.
